Part I

HÖGLWALD RESEARCH II INTERDISCIPLINARY INVESTIGATIONS ON NITROGEN TURNOVER IN A NITROGEN SATURATED FOREST ECOSYSTEM

Guest editors:
Andreas Rothe & Karl Kreutzer

Preface vii

Deposition of ammonia to the forest floor under spruce and beech at the Höglwald site
C. Huber, A. Oberhauser and K. Kreutzer 3–11

Three years of continuous measurements of atmospheric ammonia concentrations over a forest stand at the Höglwald site in southern Bavaria
C. Huber and K. Kreutzer 13–22

Diurnal courses of ammonium net uptake by the roots of adult beech (*Fagus sylvatica*) and spruce (*Picea abies*) trees
A. Geßler, J. Kreuzwieser, T. Dopatka and H. Rennenberg 23–32

Deposition and soil leaching in stands of Norway spruce and European Beech: Results from the Höglwald research in comparison with other European case studies
A. Rothe, C. Huber, K. Kreutzer, W. Weis 33–45

Influence of tree species composition on soil and soil solution properties in two mixed spruce-beech stands with contrasting history in Southern Germany
A. Rothe, K. Kreutzer and H. Küchenhoff 47–56

Development and application of a method for determination of net nitrification rates
R. Gasche, K. Butterbach-Bahl and H. Papen 57–65

Spatial variability of NO and NO_2 flux rates from soil of spruce and beech forest ecosystems
R. Gasche and H. Papen 67–76

Four years continuous record of CH_4-exchange between the atmosphere and untreated and limed soil of a N-saturated spruce and beech forest ecosystem in Germany
K. Butterbach-Bahl and H. Papen 77–90

Effect of tree distance on N_2O and CH_4-fluxes from soils in temperate forest ecosystems
K. Butterbach-Bahl, A. Rothe and H. Papen **91–103**

Soil core method for direct simultaneous determination of N_2 and N_2O emissions from forest soils
K. Butterbach-Bahl, G. Willibald and H. Papen **105–116**

Exchange of N-gases at the Höglwald Forest – A summary
K. Butterbach-Bahl, R. Gasche, G. Willibald and H. Papen **117–123**

Part II

REGULAR ARTICLES

Earthworm survival in oil contaminated soil
S.H. Shakir Hanna and R.W. Weaver **127–132**

Earthworm communities under an agricultural intensification gradient in Colombia
T. Decaëns and J.J. Jiménez **133–143**

Tree species selection and soil tillage in alley cropping systems with *Phaseolus vulgaris* L. in a humid premontane climate: biomass production, nutrient cycling and crop responses
I. Henriksen, A. Michelsen and A. Schlönvoigt **145–159**

Si amelioration of Al toxicity in barley (*Hordeum vulgare* L.) growing in two Andosols
C.K. Morikawa and M. Saigusa **161–168**

Host responses to AMF from plots differing in plant diversity
R.L. Burrows and F.L. Pfleger **169–179**

Effect of host genotype on indigenous bacterial endophytes of cotton (*Gossypium hirsutum* L.)
P.D. Adams, and J.W. Kloepper **181–189**

Abscisic acid concentration, root pH and anatomy do not explain growth differences of chickpea (*Cicer arietinum* L.) and lupin (*Lupinus angustifolius* L.) on acid and alkaline soils
W. Hartung, L. Leport, R.G. Ratcliffe, A. Sauter, R. Duda and N.C. Turner **191–199**

Volume 240 No. 2

Obituary **v–vi**

Soil-atmosphere exchange of CH_4, CO_2, NO_x, and N_2O in the Colorado shortgrass steppe under elevated CO_2
A.R. Mosier, J.A. Morgan, J.Y. King, D. LeCain and D.G. Milchunas **201–211**

Response of soil CO_2 efflux to water manipulation in a tallgrass prairie ecosystem
X. Liu, S. Wan, B. Su, D. Hui and Y. Luo **213–223**

Two-dimensional growth of a root system modelled as a diffusion process. I. Analytical solutions
P. de Willigen, M. Heinen, A. Mollier and M. Van Noordwijk **225–234**

Effects of atmospheric deposition, soil pH and acidification on heavy metal contents in soils and vegetation of semi-natural ecosystems at Rothamsted Experimental Station, UK
L. Blake and K.W.T. Goulding **235–251**

Enhancing the early performance of the leguminous shrub *Retama sphaerocarpa* (L.) Boiss.: fertilisation versus *Rhizobium* inoculation
F. Valladares, P. Villar-Salvador, S. Domínguez, M. Fernández-Pascual, J.L. Peñuelas and F.I. Pugnaire **253–262**

Contrasting seasonal patterns of fine root production for blue oaks (*Quercus douglasii*) and annual grasses in California oak woodland
X. Cheng and C.S. Bledsoe **263–274**

Decomposability of C3 and C4 grass litter sampled under different concentrations of atmospheric carbon dioxide at a natural CO_2 spring
D.J. Ross, K.R. Tate, P.C.D. Newton and H. Clark **275–286**

Copper sorption and accumulation by the extraradical mycelium of different *Glomus* spp. (arbuscular mycorrhizal fungi) isolated from the same polluted soil
C. Gonzalez-Chavez, J. D'Haen, J. Vangronsveld and J.C. Dodd **287–297**

Nitrogen fertilization alters the functioning of arbuscular mycorrhizas at two semiarid grasslands
L. Corkidi, D.L. Rowland, N.C. Johnson and E.B. Allen **299–310**

Arsenic uptake and accumulation in rice (*Oryza sativa* L.) irrigated with contaminated water
Md. Joinal Abedin, J. Cotter-Howells and A.A. Meharg **311–319**

NaCl and Na_2SO_4 alter responses of jack pine (*Pinus banksiana*) seedlings to boron
K.G. Apostol, J.J. Zwiazek and M.D. MacKinnon **321–329**

Decomposition and nutrient release by green manures in a tropical hillside agroecosystem
J.G. Cobo, E. Barrios, D.C.L. Kass and R.J. Thomas **331–342**

Ecophysiological significance of chlorophyll loss and reduced photochemical efficiency under extreme aridity in *Stipa tenacissima* L.
L. Balaguer, F.I. Pugnaire, E. Martínez-Ferri, C. Armas, F. Valladares and E. Manrique **343–352**

Volume contents **353–355**

Author index **357**

Instructions for authors **359–365**
